We provide 80+ pre-built reports for staffing and recruiting businesses, which are grouped by features or roles for ease-of-use. Just select a report on placements, rep activity or opportunities and analyze it to make strategic decisions for your business.

Build your own reports

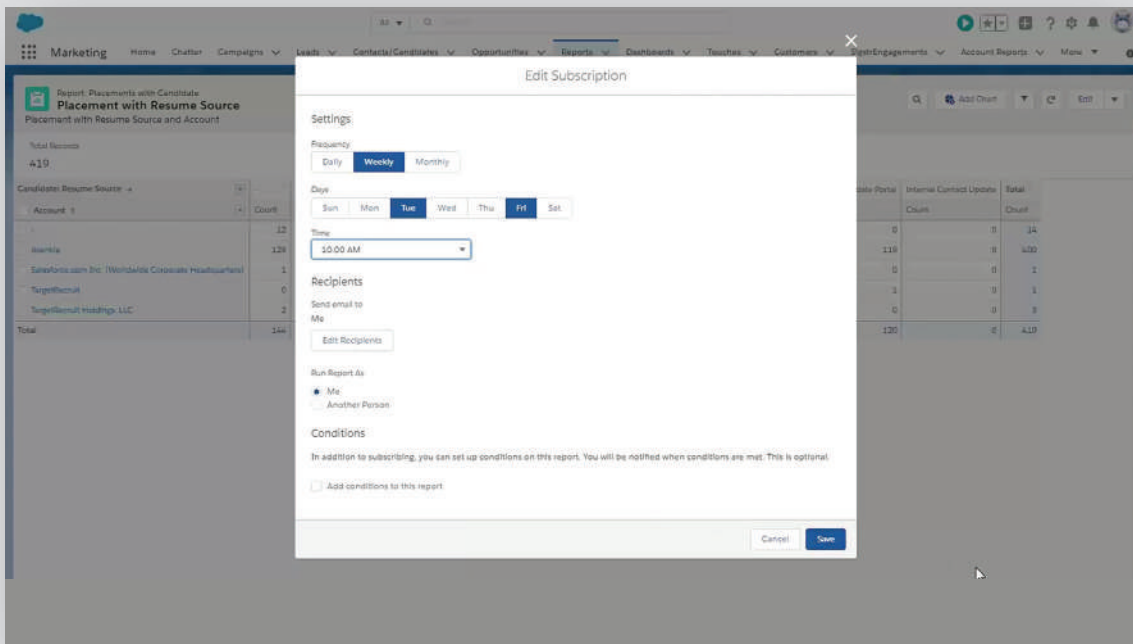

TargetRecruit's reporting suite allows you to create beautiful reports in minutes, without the need for specialized knowledge. You can drag and drop fields, define criteria, modify filters, group fields and run the report the way you want. Filters and groupings for the report that is displayed can be changed in real-time.

You can even visualize your data with dynamic charts. Everything is "point and click" – no coding required.

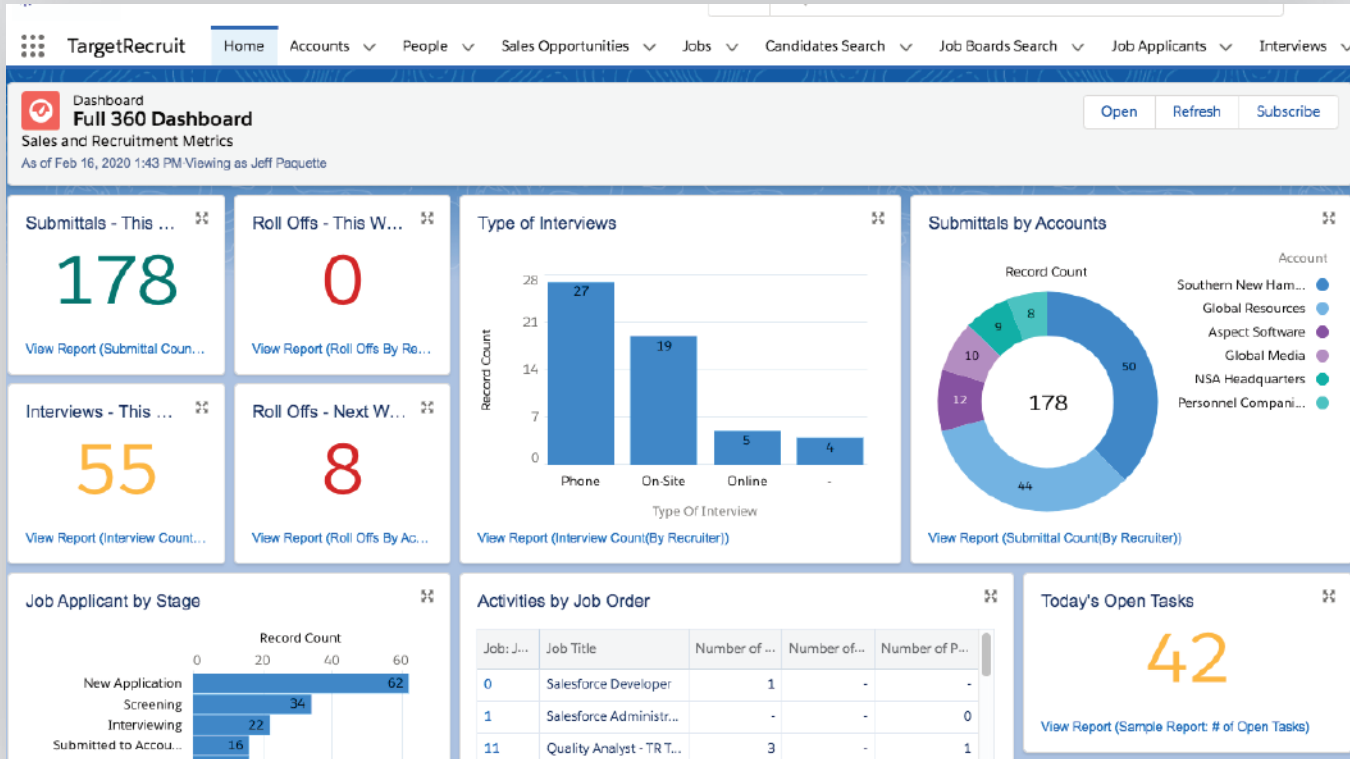

Schedule and Share

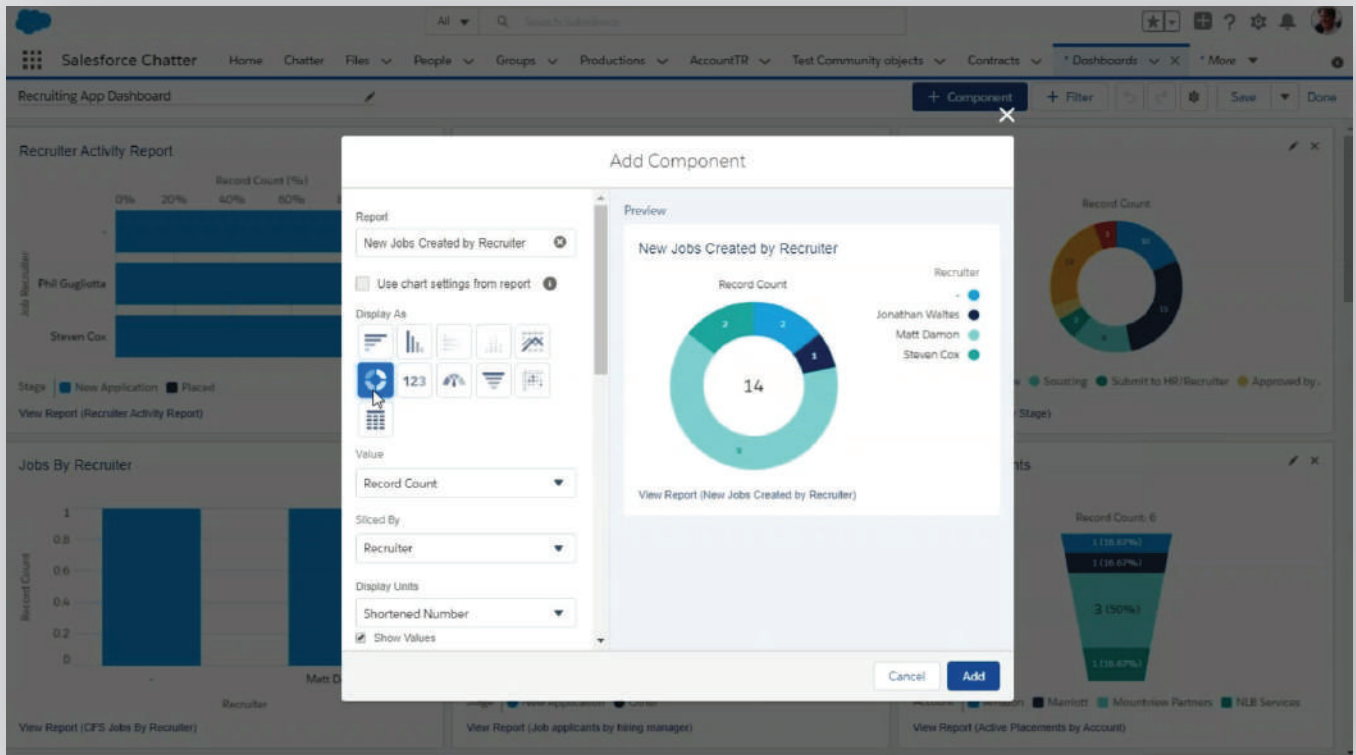

You can schedule reports to run daily, weekly or monthly and have the results automatically emailed to other users in your organization or non-TargetRecruit users.

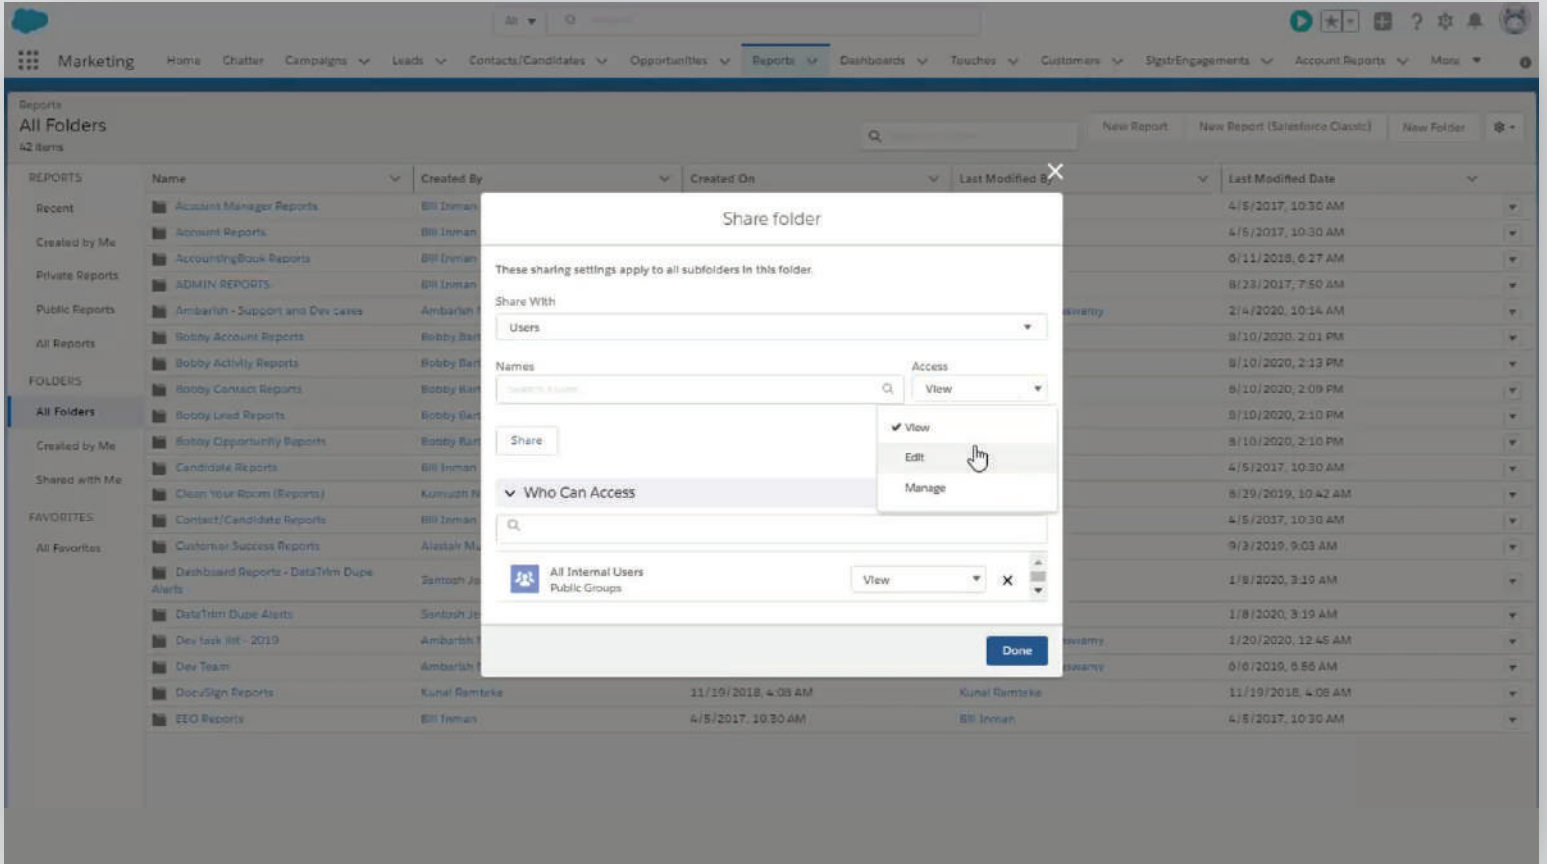

Dashboards

Our Dashboards convert the information from your source reports into one of several visualizations. You can choose a table chart, pie, gauge or other visual tools. And like reports, Dashboards can be built using drag-and-drop.

Get high-performance analytics and high-performance security all in one place. You can control access to a report or folder or dashboard by user, group or role. Easily define who can view the report and who can edit it. TargetRecruit helps you empower and protect.

Bring your data to life with TargetRecruit's Reports and Dashboards.
