

The interview will never be the same

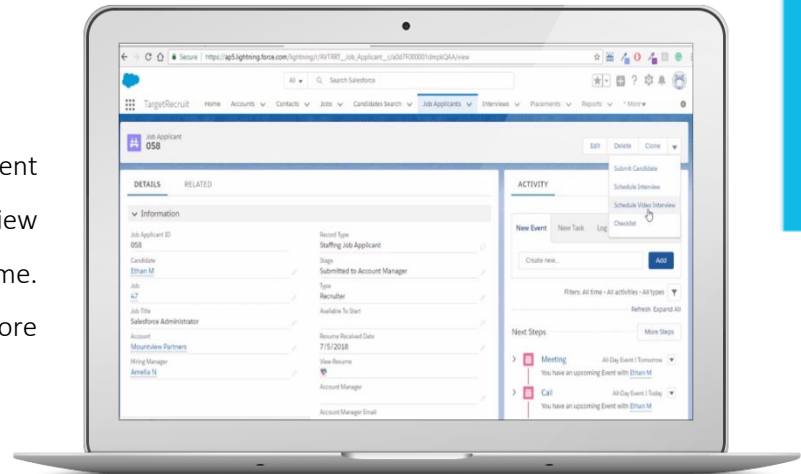

## Introducing Video Interviewing- In Partnership with XpertReview

Video interviewing allows you to find the best candidate among a big stack of qualified candidates. Fast. With TargetRecruit, you can interview any candidate, anywhere, any time. Powered by [XpertReview](#), our video technology partner, users can design interviews and have candidates record their responses at their convenience – all across a leading-edge video platform.

XpertReview is an Interview as a Service (IaaS) platform for managing and monitoring the candidate screening lifecycle. Using video enabled self-assessments and one-on-one live interviews, both clients and candidates will get a lot more from the interview process. Let TargetRecruit show you how.

### Own the interview process.

Video interviewing dramatically reduces the time and energy spent scheduling and conducting face-to-face interviews. Now interview questions can be scripted and candidates can respond on their time. No more back and forth with emails and phone calls. No more scheduling errors and wasted resources.

### The video interview is so easy.

Find the job. Then find the candidate. Forward an email of instructions and questions and allow your candidate to record answers at their convenience, using just a web browser. All that's left is to review and make a decision about the candidate.

### Get smart about screening.

Dive deeper into each candidate. Assess body language and other visual cues. Compare candidates instantly. Collaborate with peers and managers and make better hiring decisions. Video provides a clearer picture of candidate strengths and weaknesses, so you'll always have the best fit for the job.
